---

## Profile

Full Stack Developer with strong MERN stack skills (MongoDB, Express.js, React.js, Node.js). Experienced in building responsive websites and creating APIs. Passionate about writing clean code and building user-friendly web applications. Quick learner who enjoys solving complex problems and working in teams. Looking for opportunities to grow as a developer while contributing to meaningful projects.

---

## Experience

**Full Stack Developer Intern | Edureka | January 2024 - May 2024**

- Learned and applied core front-end and back-end development principles.
- Developed RESTful APIs using Node.js and Express.js.
- Created responsive interfaces using React.js

---

## Projects

**JobBox – MERN Stack Job Portal** [Live link](#)

- Developed a job portal using MERN Stack (MongoDB, Express.js, React.js, Node.js) with JWT authentication for secure access.
- Implemented a dual-role system: Companies can post jobs and manage applications, while Students can search, apply, and save jobs.
- Created an advanced job search with filters for location and job type.
- Built a real-time application tracking system with automated email notifications.
- Integrated job expiry and auto-archive functionality to manage outdated job posts.

**Weather App – Frontend Project** [Live link](#)

- Designed a responsive weather app using HTML, CSS, and JavaScript, integrated with OpenWeather API for real-time data.
- Implemented city-based search with dynamic weather updates and forecast display.
- Added auto-location detection for instant local weather updates.
- Developed an interactive UI with animated weather icons and a fully responsive design.
- Enhanced user experience with error handling for invalid or unavailable city searches.

---

## Certifications

**Web Development Certification**

**Internshala | Sep 2022 - Dec 2022**

- Comprehensive training on HTML, CSS, JavaScript, and introductory back-end development.
